

# Projected 3D Bellman Cost-to-Go - Exact Physical Successor Grid

## J6D objective contract -> V4D(x,y,h,psi\_in) -> min over psi\_in

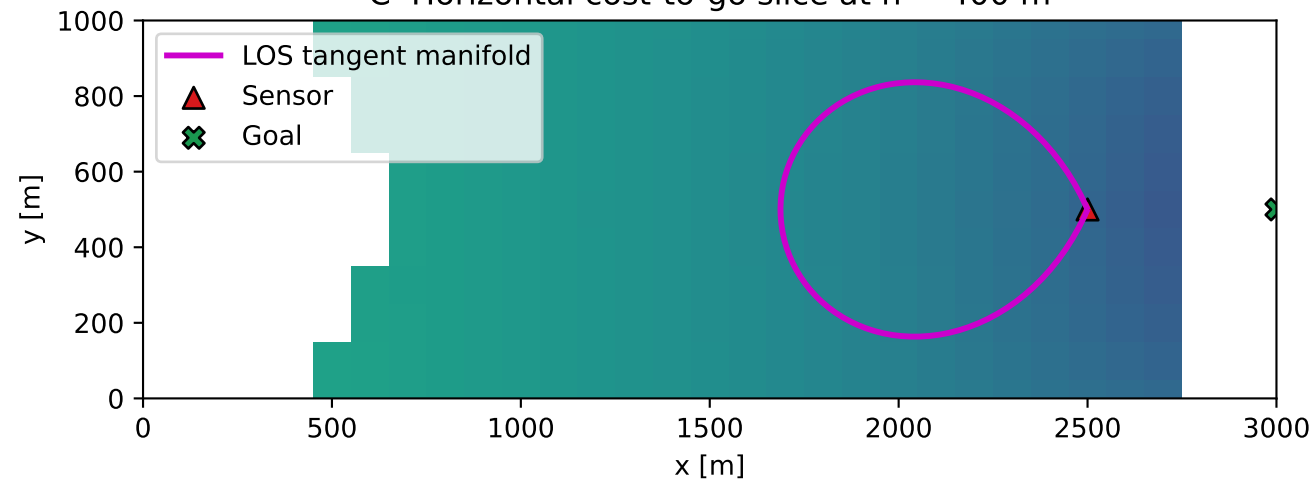

A Finite projected Bellman cost-to-go support

B Projected cost-to-go at  $y = 500$  m

C Horizontal cost-to-go slice at  $h = 400$  m

D PoD-to-go along the cost-minimizing Bellman policy
